# Correction to: Genome-wide sequencing as a first-tier screening test for short tandem repeat expansions

Indhu-Shree Rajan-Babu<sup>1,2\*</sup>, Junran J. Peng<sup>1</sup>, Readman Chiu<sup>3</sup>, IMAGINE Study<sup>1</sup>, CAUSES Study<sup>1</sup>, Chenkai Li<sup>3,4</sup>, Arezoo Mohajeri<sup>1</sup>, Egor Dolzhenko<sup>5</sup>, Michael A. Eberle<sup>5</sup>, Inanc Birol<sup>1,3</sup> and Jan M. Friedman<sup>1</sup>

**Correction to: *Genome Med* 13, 126 (2021)**

<https://doi.org/10.1186/s13073-021-00932-9>

It was highlighted that in the original article [1] the list of the authors belonging in the IMAGINE and CAUSES Study were erroneously interchanged. The original article has been updated.

## Acknowledgements

We would like to thank all the CAUSES and IMAGINE Study investigators. CAUSES Study investigators include Shelin Adam, Christele Du Souich, Alison Elliott, Anna Lehman, Jill Mwenifumbo, Tanya Nelson, Clara van Karnebeek, Rajan-Babu et al. *Genome Medicine* (2021) 13:126 Page 13 of 15 and Jan Friedman. The CAUSES Study is funded by Mining for Miracles, British Columbia Children's Hospital Foundation, and Genome British Columbia. IMAGINE Study investigators include Patricia Birch, Madeline Couse, Colleen Guimond, Anna Lehman, Jill Mwenifumbo, Clara van Karnebeek, and Jan Friedman. We thank Compute Canada for the Research Allocation Competitions allocation, which facilitated our analysis of the IMAGINE and EGA genomes, and Julia Handra for coordinating the STR molecular testing of the clinical samples.

Ready to submit your research? Choose BMC and benefit from:

- fast, convenient online submission
- thorough peer review by experienced researchers in your field
- rapid publication on acceptance
- support for research data, including large and complex data types
- gold Open Access which fosters wider collaboration and increased citations
- maximum visibility for your research: over 100M website views per year

At BMC, research is always in progress.
